This chart is a graphic single-point-in-time portrayal of the Table of Frequency Allocations used by the FCC and ITU. An allocation is not completed until all aspects of the allocation are complete and are in the Table of Frequency Allocations. Therefore, for complete information, you should consult the Table to determine the current status of U.S. allocations.

Beacon details – S1G

- 2 types of beacons
 - Short beacon (transmitted ~100 TUs)
 - Compressed SSID, RPS
 - Reduce airtime consumption (beacon bloat)
 - Full beacon (transmitted ~1000 TUs)
 - QoS/WMM, Full/short beacon interval times, uncompressed SSID, and many other super exciting IEs for PCAP geeks
